

# GRAIN CART SCALES

★ EFFICIENT    ★ ACCURATE    ★ DEPENDABLE

[www.triplestarmfg.ca](http://www.triplestarmfg.ca)

Triple Star Mfg is your scale systems expert.

Complete kits, factory parts, retrofitting and installation service are all available under one roof.

Triple Star's grain cart scale systems utilize Avery Weigh-Tronix and Digi-Star weigh bars that are designed to withstand anything you cant throw at it.

A wide range of indicators, remote displays and accessories are available for a complete weighing system.

- ★ Calculate yields for field totals or check strips
- ★ Manage inventories
- ★ Weigh in the field to maximize truck loads
- ★ Calibrate yield monitors
- ★ Typical accuracy of 0.5%
- ★ Fits any model of grain cart

## What typically comes in a grain cart scale kit.

With the **Agrimatics Serial Link** add-on, it allows you to have live weights on the side of your grain cart for all to see.

The **Weigh-Tronix 660** is a durable general-purpose AG indicator with basic Bluetooth capabilities. The 660 has a color changing, reflective LCD screen for readability in any/all lighting conditions.

**Agrimatics** utilizes state of the art technology to simplify and streamline time consuming tasks into one application in the palm of your hand.

The **Libra Cart** app will automatically track/record each unload, and will save it to your selected field, so you never need to miss writing down a load.
